GOGGLE FEATURES

	<p>SCOTT FIT SYSTEM The patent pending SCOTT FIT SYSTEM is a mechanical adjustment located at the bottom of each side of the goggle, allowing you to choose between four positions to get a customized face and nose fit.</p>
	<p>OVER THE GLASSES (OTG) OTG goggles offer protection from the elements and an optimized fit for people requiring prescription glasses.</p>
	<p>HELMET COMPATIBILITY SCOTT goggles are engineered to engage flawlessly with a variety of helmets.</p>
	<p>REVOLUTIONARY AIR MANAGEMENT SYSTEM (RAM) RAM is a patented frame ventilation system that directs airflow within the goggle by using a clean and controlled top-to-bottom pattern, eliminating "swirling air" and fogging.</p>
	<p>NO-SLIP SILICONE STRAP An adhered silicone strip on the inside of the goggle strap ensures the goggles stay right where they should on a helmet.</p>
	<p>ADJUSTABLE NOSE GUARD Exclusive to SCOTT, the Adjustable Nose Guard on the Tyrant adjusts in three different positions allowing riders to configure the guard exactly to their liking.</p>

FACE FOAM CONSTRUCTION

		<p>NOSWEAT 3.2 FACE FOAM <small>[Patent Pending]</small> NoSweat 3.2 Face Foam system channels sweat away from the face while relieving pressure from the nose to provide the most advanced sweat protection and comfortable fit on the market. The first foam system integrates the proven 3-layer NoSweat foam across the top half of the goggle. The first layer channels sweat away from the face; the middle layer absorbs sweat; the third fleece layer creates a comfortable fit and seal. The second foam system bonds 2-layer foam to the lower half of the goggle. The first layer of high volume contour molded foam provides cushioning and absorbs sweat. The second fleece layer creates a comfortable fit and seal.</p>
		<p>MULTI-LAYER FACE FOAM SCOTT's Multi-Layer Face Foam incorporates two layers of foam and one layer of fleece, delivering a comfortable performance fit. The first layer features maximum sweat retention properties and provides cushioning from the frame while the second layer ensures a precise comfortable face fit. The third layer provides a comfortable barrier between the goggle and rider's face.</p>
		<p>HYPALLERGENIC SUPER-SOFT FACE FOAM SCOTT's Hypoallergenic Super-Soft Face Foam provides a precise fit around facial features while sealing out the elements. This single density foam is comfortable and has moisture retention properties.</p>

	<p>AIR CONTROL SYSTEM (ACS) ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle. The result is a sophisticated ventilation system that helps prevent condensation and fogging.</p>
	<p>ASYMMETRICAL TEAROFF PIN SYSTEM The SCOTT WORKS asymmetrical tearoff pin system is a set of clear tearoff pins where one is a static pin and the other is an oval swivel that allows the rider to micro adjust the tearoff tension using a flat head tool. This adjustment helps perfect the fit and pull away tension per the conditions and rider's preferences. These pins can easily be removed to accommodate our WORKS film canisters.</p>

SCOTT FIT SYSTEM

Located on the outside of the goggle frame, the patent pending SCOTT Fit System creates a custom face and nose fit.

STANDARD LENSES

Standard single lenses are constructed from polycarbonate material to maintain impact resistance and provide 100% UV protection. Standard lenses do not include tearoff posts.

SCOTT WORKS FILM SYSTEM

Affixed on the lens by the roll-off canisters, the SCOTT ANTI-STICK GRID grid ensures a seamless sliding movement of the film over the lens. With an integrated mudflap to prevent water or mud from entering between the film and lens.

RAM VENTING

Revolutionary Air Management (RAM) is a patented frame ventilation system that directs airflow within the goggle by using a clean and controlled top-to-bottom pattern, eliminating "swirling air" and fogging.

WORKS LENSES

WORKS single lenses are built with factory installed WORKS adjustable tearoff pins and can adapt to fit the WORKS film system. WORKS lenses are made from polycarbonate material to maintain impact resistance and provide 100% UV protection.

SCOTT TYRANT RAM-AIR PLUG

Exclusive to SCOTT, the adjustable plug, that is removable enables a full or partial seal of the RAM Air frame openings allowing the rider to customize his or her ventilation settings.
