

2017 ONROAD WORKBOOK

—
NO SHORTCUTS

NO SHORTCUTS

NO SHORTCUTS

Like the modest champion sitting in the corner listening as others spit their egos all over each other, SCOTT quietly lets its achievements, its victories, its skills speak for themselves. We don't make products for those who yearn to be noticed. We make them for those who are going to do what they do whether there's anyone watching or not.

If you're like us, you say what you say, do what you do, ride where you ride because you love it. You do it the right way. You do it for the right reasons.

INNOVATION TECHNOLOGY DESIGN

SINCE 1958 SCOTT SPORTS HAS PUSHED THE LIMITS OF INNOVATION, TECHNOLOGY AND DESIGN. FROM THE FIRST ALUMINIUM SKI POLE, TO THE INTRODUCTION OF AERO BARS AND THE ORIGINAL PLASTIC MOTO CROSS BOOT, WE HAVE LED THE WAY IN THE SPORTS INDUSTRY. COMBINING ENDLESS DETERMINATION TO IMPROVE WITH THE METHODICAL INTRICACY PUT INTO EACH PRODUCT, SCOTT PREPARES ATHLETES TO REACH THEIR HIGHEST POTENTIALS. THE 2017 COLLECTION EXEMPLIFIES THIS MENTALITY AND THE UNIFICATION OF OUR THREE CORE PHILOSOPHIES. WHEN YOU PUSH YOURSELF TO THE LIMIT SCOTT WILL STAND BY YOU AND HELP YOU SURPASS WHAT EVEN YOU BELIEVED WAS IMPOSSIBLE. LET OUR PASSION BECOME YOUR PASSION AND YOUR SUCCESSES BECOME OUR SUCCESSES.

SCOTT ADVENTURE

—

SCOTT MODULAR SYSTEM

The SCOTT Modular System was created to provide a solution for riding in changing and diverse weather conditions. A three piece system composed of the Concept VTD, the Concept DP and the Insuloft jacket, delivers 5 different combinations of usage. For a typical sunny day the Concept VTD can be worn on its own. With strategic ventilation you can adjust the jacket and pants depending on the season. When the temperature begins to drop the simple incorporation of the Insuloft under the Concept VTD will keep you warm. In the unfortunate case of rain the Concept DP can be worn over the Concept VTD (with or without the Insuloft underneath) to provide a completely waterproof barrier. Additionally the DP jacket and pant were constructed with pockets for protectors. This makes it the perfect solution to wear over urban clothes, preventing contact with dirt, oil or rain.

GLOVES TECHNOLOGIES

MCFIT

"mcfIT technology" is a glove assembling technology using special adhesive members in assembling each layer of a glove (lining, membrane insert and out-shell) avoiding sewing process completely. The technology can be applied to not only WWB glove, but also single layer glove without limitation to the materials and designs.

This innovative technology provides your hands "Maximum Comfort" through the benefits as: Tactility and Dexterity, One-layer Fitting and Superior Grip Durability, Additional Wind-proof of Heavy insulated gloves of Thimble shape adhesive members.

SCOTT PROTECTION

—

SCOTT SOFTCON JACKET PROTECTOR

232314

The SCOTT Softcon jacket exemplifies cutting edge personal safety technology and provides unmatched comfort. It is designed to be worn under the jersey and integrates seamlessly with most neck braces. The innovative soft SAS-TEC™ foam is associated with a very tear and scratch resistant foil but is built with venting for improved breathability.

CONSTRUCTION:

- + One-piece plate in SAS-TEC™ on Back & Chest
- + SAS-TEC™ pads on elbow & shoulder
- + 3D and stretchable mesh fabrics

SIZE: M-XL

FEATURES

- + Perfect Neck brace compatibility
- + Removable elbow and shoulder pads
- + Anti-moisture inner panels in 3D mesh
- + Main body made of stretch mesh fabric
- + Arm pump free construction
- + Lock zipper
- + Seamless collar

black - 0001

SCOTT SOFTCON VEST PROTECTOR

232315

The SCOTT Softcon Vest is designed to be worn under the jersey and integrates seamlessly with most neck braces. The Vest offers the same protective SAS-TEC™ foam as the jacket and is perfect for those who want chest and back protection without the arm and elbow pads.

CONSTRUCTION:

- + One-piece plate in SAS-TEC™ on Back & Chest
- + 3D and stretchable mesh fabrics

SIZE: M-XL

FEATURES

- + Perfect Neck brace compatibility
- + Anti-moisture inner panels in 3D mesh
- + Main body made of stretch mesh fabric
- + Lock zipper
- + Seamless collar

black - 0001

SCOTT SOFT CR II BACK PROTECTOR

237211

The SCOTT Soft CR II back protector features the innovative D3O® Viper plate. The plate is low profile which makes it compatible with most neck braces.

CONSTRUCTION:

- D3O® Viper protective plate
- Aerated 3D mesh

SIZE: M-XL

FEATURES

- + Removable, soft, ventilated D3O® Viper back plate
- + Breathable mesh back panel
- + Adjustable shoulder straps and chest belt
- + Double elastic hip belt

black/green - 1043

black/green - 1043

SCOTT SOFT CR II JUNIOR BACK PROTECTOR

225600

The Junior SCOTT Soft CR II back protector features the innovative D3O® Viper plate surrounded by ventilated 3D mesh. The plate is low profile which makes it compatible with most neck braces. With multiple adjusting straps the Junior Soft CR II can be adjusted for a custom fit.

CONSTRUCTION:
D3O® Viper protective plate
Aerated 3D mesh

SIZE: XS-S

FEATURES
+ Removable, soft and ventilated D3O® back plate
+ Removable, adjustable shoulder straps
+ Adjustable sternum strap
+ Double elastic hipbelt

SCOTT CLEANING RECOMMENDATIONS

EVERY ITEM OF CLOTHING CARRIES A SEWN-IN SET OF WASHING INSTRUCTIONS AND IT'S IMPORTANT THAT THESE INSTRUCTIONS ARE FOLLOWED. IN ORDER TO KEEP CLOTHES FUNCTIONING WELL OVER TIME, HERE ARE A FEW ADDITIONAL HINTS AND TIPS.

CLEANING RECOMMENDATIONS

Remove protectors and close all fasteners.

Turn the item of clothing inside out.

Wash with a liquid laundry detergent such as Nikwax Tech Wash® and rinse well. Do not use fabric softener. Short spin on 650-700 spin cycles.

Dry in a well-ventilated place, do not leave to dry on a hot surface.

Where necessary, impregnate the dry clothing with Nikwax TX.Direct® Spray-on. Avoid the reflective areas.

REGULAR CARE

DIRT: In the event of severe soiling, brush off the dirt or wipe it off with a damp cloth.

FASTENERS: To ensure the smooth function of zip fasteners and press studs, apply Edding® 8150 oil maintenance marker.

LEATHER TREATMENT: Protect leather items by applying Nikwax Leather Restorer™ at regular intervals.

CLEANING RECOMMENDATIONS LEATHER

Leather clothing can be taken to a leather cleaning specialist for intensive cleaning and a special impregnation to protect the leather. Alternatively, leather clothing items can be cleaned as follows:

Use a damp cloth to wipe off any dirt, or brush it off under running water. Spray the damp clothing with Nikwax Leather Cleaner™ and clean. Avoid the reflective and fabric areas. Wipe the outer material with a clean, damp cloth.

Shake out the creases well and hang to dry at room temperature. Lay heavy items flat on a towel and allow to dry.

IMPORTANT: Do not dry in a tumble dryer or in direct sunlight!

If the leather is still slightly damp, knead gently by hand to keep it soft and supple!

Once dry, pull it lengthways and crossways and give it a thorough rub.

Where necessary, treat the dry or wet clothing with Nikwax Leather Restorer™. Avoid the reflective and fabric areas. If any dull streaks appear once the leather is dry they can be rubbed off with a dry cloth.

REGULAR CARE

DIRT: In the event of severe soiling, brush off the dirt or wipe it off with a damp cloth.

FASTENERS: To ensure the smooth function of zip fasteners and press studs, apply Edding® 8150 oil maintenance marker.

LEATHER TREATMENT: Protect leather items by applying Nikwax Leather Restorer™ at regular intervals.

GLOVES: Treat gloves with the Nikwax Glove Proof sponge to ensure they maintain their special properties

SHELL FABRIC TECHNOLOGIES

GORE-TEX® TECHNOLOGIES

GUARANTEED TO KEEP YOU DRY™ PROMISE

For more than 30 years, GORE-TEX® products have been delivering comfort and protection so you can enjoy your outdoor activities with confidence. The GORE-TEX® membrane is integrated in the garment between the outer material and the lining. It is a perfect barrier to rain and wind, while allowing perspiration to escape. Even in cases of extreme physical exertion, humidity will be transported to the outside of the clothing system and you always stay comfortable in your SCOTT garments engineered with GORE-TEX® products.

3-LAYER GORE-TEX® CONSTRUCTION

For extreme conditions and for best weatherprotection. Outshell, membrane and lining bonded to a functional layer.

Z-LINER GORE-TEX® CONSTRUCTION

Light and soft solution for non-restrictive designs. Membrane inserted liner between outshell and lining.

PITTARDS®

A digital leather produced in the UK. Motorcyclists worldwide demand the highest level of performance from their protective gloving equipment.

DRYOSPHERE

DRYOsphere fabrics provide a waterproof/windproof/breathable barrier, protecting you from the elements. Combined with our DRYOzone DWR (Durable Water Repellent), these technologies act as a shield against water and wind, while enabling vapor to escape. This combination of protection and breathability keeps you dry and comfortable in any condition.

WATERPROOF

Helps you stay dry with eco-compatible durable water repellent technology (DWR) on the outermost surface. It also helps to repel stains.

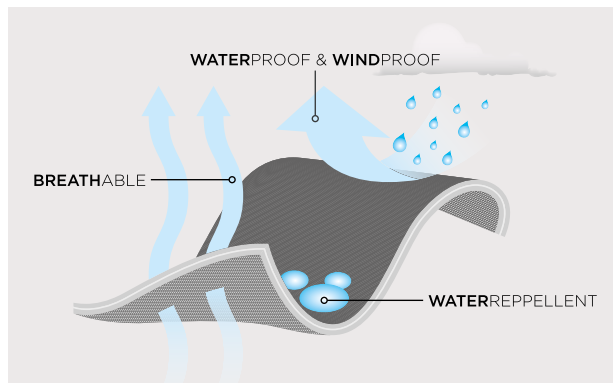

WINDPROOF

DWR technology also helps you stay warm by blocking out the wind.

BREATHABLE

Helps to regulate your body temperature and keep you comfortable by enabling vapor to escape.

2 & 3 layer shell fabrics with a polyurethane layer bonded to the underside combined with DRYOzone DWR on the outermost surface provides a minimum capability of 10,000mm water pressure resistance & 10,000mm moisture transport performance.

SCOTT PROTECTION TECHNOLOGIES

SCOTT SOFTCON PROTECTIVE SYSTEM

THE REVOLUTIONARY SOFTCON JACKET IS THE MOST FLEXIBLE AND COMFORTABLE SOLUTION TO BE PROTECTED WITHOUT COMPROMISING PROTECTION. COMBINING INNOVATIVE MATERIALS - SAS-TEC™ AND A UNIQUE DESIGN THE NEW SOFTCON DELIVERS UNPARALLELED FREEDOM OF MOVEMENT WHILE REMAINING PROTECTIVE BY PASSING TREE STANDARDS. ITS BACK AND FRONT ARE LOW PROFILED AND HAVE SPECIAL RECESS TO INCORPORATE AND FIT WITH NECK BRACES.

PERFECT NECK BRACE COMPATIBILITY

The recessed shape on front and back allows putting easily the neck brace on the protector without removing any parts and wearing the neck brace on the jersey.

FLEXIBLE SAS SAS-TEC™ FOAM STRUCTURE

SCOTT Motosports collection uses a unique viscoelastic material called SAS-TEC™ that enhance flexibility allowing the protection to conform to the body and ensure a tight and consistent seal.

LOW PROFILE AND INVISIBLE LOOK

The protection is so thin that it is invisible under the jersey.

D3O® TECHNOLOGY

HOW DOES D3O® MATERIAL WORK?

D3O® is a patented material with intelligent molecules. It flows with you as you move but locks together on impact to absorb energy and protect you. This unique innovative component provides an optimal freedom of movement and surpasses CE standards.

INCREASED COMFORT AND MOBILITY.

D3O® back protection is low profile, lightweight, flexible and soft. D3O® protectors allow for complete freedom of movement and mold to your body so you will not even feel like you are wearing a back protector.

SAS-TEC PROTECTION

SAS-TEC
body protection systems

SAS-TEC experts have years of experience with shock absorbing systems. The systems have passed all of Scott's requirements and have significantly outperformed the benchmark for all joint and back protectors in the European Market, known as the CE Standards.

3D-Protector from visco elastic soft foam with outstanding shock absorption values: Residual force according to EN 1621-2 under 7KN (limit Level 2: 9KN). Anatomically perfectly adapted and barely noticeable. High-end engineering for greater performance.

SCOTT APPAREL FEATURES

01. Removable membrane / thermal lining

02. Snap and hook with YKK FlexFix

03. Connection zipper

04. Comfortable cuff

05. One hand adjustment at hem

06. One hand adjustment at collar

07. Sleeve adjustment

08. Antislip at bottom

09. Front flap insulation

10. Easy zip handle

11. Colored Velcros

12. Fleece lined collar

13. Ventilation system

FUNCTIONAL TECHNOLOGIES

FIDLOCK® MAGNETIC SNAP SYSTEM

This snap/magnet combination unites the convenience of a magnetic fastener with the stability of a mechanical snap.

STORM CUFF WITH THUMB LOOP

Built to optimize water resistance, the Storm Cuff with Thumb Loop provides a comfortable solution to prevent water from entering between the glove and the cuff.

FLEXFIX

This collar solution eases the fastening of the collar through the usage of a magnet to guide the closure. Combining this with the strong YKK snap secures the collar in place with minimal effort. This system also allows for the collar to be securely fastened in the open position to prevent it from fluttering in the wind.

DIRECT VENTILATION

In products that feature direct-laminated construction the outer membrane is fused together with the lining and insulation. Unlike in traditional jacket and pant construction, opening a direct ventilation allows for air circulation to penetrate all the way to the surface of the skin. Maximizing temperature control and cooling effectiveness.

TEETHLESS ITD WATERPROOF ZIPPER

A completely waterproof solution, the Teethless ITD Waterproof Zipper creates a seamless seal, locking out water. To optimize usage its best to use some SLIP OIL (main ingredient non-toxic silicone) on the surface of the zipper after washing for smooth operation.

HYBRID PROTECTOR POCKET

The Hybrid Protector Pocket is located at either the knee or the elbow to facilitate the personal adjustment of joint protection. Each pocket has two positions giving the rider the option of lowering or raising the protector 30mm. This precise adjustment can make all the difference in ensuring riding comfort and maximizing safety.
