GLOVES TECHNOLOGIES

Clarino™

The secret to Clarino's™ superior strength and supple hand-feel is the ultra-fine fibre technology. The material is composed of a non-woven fabric consisting of ultra-fine fibres which are impregnated with polyurethane. This helps the fibre to be more flexible and easier to process.

D3O® is a unique material that focuses on energy dispersion in critical areas for maximum shock absorption and protection. The functionality of the raw material originates from the synergetic effects of the polymer-based dilatant. Energy is distributed throughout the synthetic elastomeric polymer and the enhanced chemistry continues to disperse the energy throughout the matrix, significantly reducing the effect of impact.

SCOTT Touchscreen Technology - placed on the tip of the index finger allows the rider to interact with their touchscreen devices without removing the gloves.

GLOVE TECHNOLOGIES

For more than 30 years, GORE-TEX products have been delivering comfort and protection so you can enjoy your outdoor activities with confidence. The GORE-TEX membrane is integrated in the garment between the outer material and the lining. It is a perfect barrier to rain and wind, while allowing perspiration to escape.

PrimaLoft® insulation products offer superior performance in cold weather. PrimaLoft® is lightweight, breathable and proven to repel water better than any other synthetic or natural insulation.

DRYOsphere fabrics provide a waterproof/breathable barrier from the elements. A shield against water and wind, DRYOsphere fabric also allows for water vapor to escape from the body, keeping you dry and comfortable in any conditions.
